Federal Administration Cloud Tiers

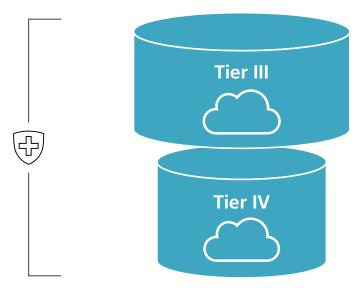

Public Cloud

Public Cloud with full range of functionality

Public Cloud Switzerland

Public Cloud with data storage and processing on Swiss territory or with additional measures

Private Cloud Bund

Standard product for a wide range of applications on the federal government's own infrastructure

Secure Private Cloud Bund

A dedicated product for special requirements (e.g. emergency services, telecommunications surveillance) on the federal government's own infrastructure and with greatest level of control

No Cloud: There are still federal government applications that are operated exclusively on federally owned data centres
